Javo Toploader

Javo Toploader

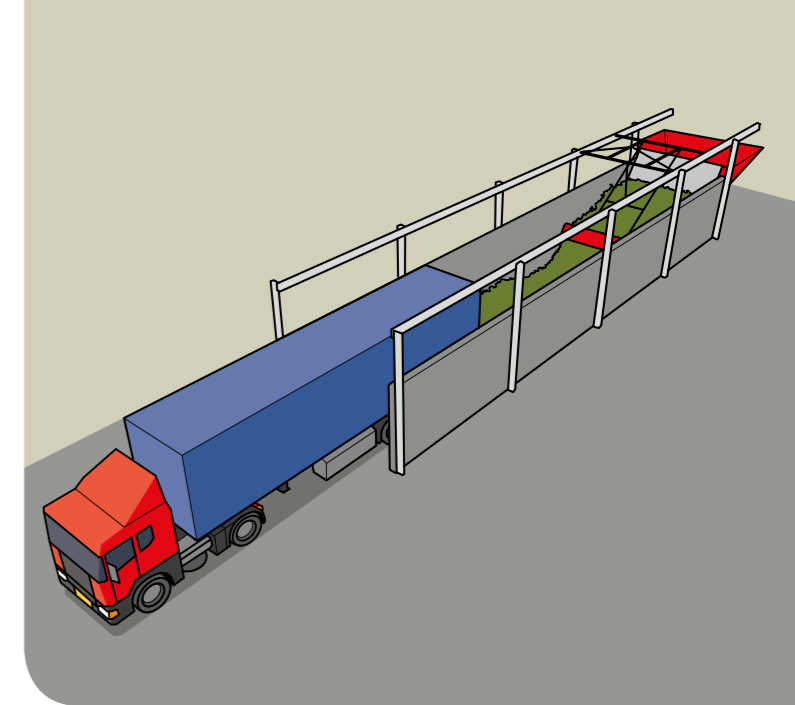

The Javo Toploader has been in production for over 11 years. Developed with the benefit of Javo's 40 years of experience in producing top quality machinery, the patented design provides a self emptying bunker system for any media demands, a completely sustainable system for the storage and distribution of wood chips, substrate and other (waste) bulk products.

Advantages:

- Very high capacity possible, depending on model
- Complete and very sustainable system
- Low energy consumption
- Very low maintenance costs
- No restrictions in length
- Suitable for a wide variety of bulk material, like wood chips, bark and other biomass, agricultural and waste products.
- Different types of side walls possible
- Smooth side walls prevent any material from being left in the bunker
- Minimal loss of storage capacity
- Dimensions are adjustable depending on requirements and capacity
- Minimal ground works required
- All working parts away from the bulk material, for an easy reach for maintenance.

Available options:

- Extra wide bunker (up to 6m)
- Side by side bunkers for extra capacity
- Additional program for extra high storage capacity
- No overhead bars to allow tipping lorries
- Client specific colour
- VPN connection for quick maintenance
- Warning when almost empty by e-mail or SMS
- Breakdown warning
- Different types of walls possible
- Loading bunker from above
- Available in stainless steel

How does the machine work

The patented scraping technique delivers the bulk material to a discharge conveyor. The fork is powered back and forth automatically.

Different types of side walls of the machine prevent any substrate remaining in the bunker. The bunker can be loaded very efficiently inside its own rail system. Minimum loss of storage capacity.

All movements are PLC controlled and equipped with electronic speed control. All moving and electrical parts are mounted away from the bulk material.

The flexibility of this system is that it can be mounted into an existing construction or a new build to suit your requirements.

The Toploader is in continuous communication with its media necessities.

Javo as your Toploader supplier

Javo is the premier Toploader supplier. With years of experience of customers using the Javo Toploader Material Handling System, we can provide our customers with excellent advice and customized solutions to specific problems. Javo provides a first class after sales service. We have installed over 50 Javo Toploaders worldwide.
